

## Themes

### Pet Friends

Which pets have tails? How do we care for pets? Do pets have feelings too? Children will answer these questions and so much more as you learn about animals together.

### Gardening & Growing

Dig in the dirt, plant seeds, and discover insects and wiggly worms! Whether your explorations take place in the rooftop garden of an apartment building, in a window box, or in a backyard, infants and toddlers will find endless fascination with seeing things grow.

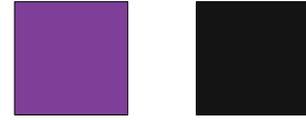

### Summer Days

Put on your sunglasses and get ready to relax and enjoy the start of summer. In this theme, children will engage in water play and active games, explore shadows, enjoy frosty treats, and more.

### Super Sports

Get up and move! Invite children to engage in a variety of games that focus on fostering their emerging fine and gross motor skills. Children will toss and kick balls, wave parachutes, and learn about basic teamwork.

## Color/Shape

## Sign Language

pea

Make a hook with index finger. Tap hooked finger on straight index finger to represent peas in a pod.

outside

Open hand toward face; close hand as you pull it away in the direction of the exit.

water

Right hand W taps chin with index finger.

## Learn with Me!

### Watching a Seed Grow

Is there a place at home where you could plant a seed? It could be in a sunny window or outdoors depending on your space. Let your child help. Talk about how the plant gets taller and taller. Count new leaves together.

### Outdoor Reading

Add extra fun to your summer days by reading outdoors with your child. Collect a few books and go out to your backyard or to a local park to read. Nature sounds and fresh air make a nice addition to the reading experience.

### My Project: Twin Tulip

When I bring this project home, we can:

- Count the tulips.
- Name the colors we see in the artwork.
- Look for flowers together around our home or at a park.
